6102-000069/US

Amendment D and Response to Office Action dated August 17, 2007

February 15, 2008

IN THE SPECIFICATION

Please replace the ABSTRACT with the following:

An improved transdermal delivery system (TDS) comprises a self-adhesive matrix comprising a solid or semi-solid semi-permeable polymer which contains rotigotine in its free base form as a multitude of microreservoirs within the matrix. The self-adhesive matrix is highly permeable to the free base of rotigotine and is impermeable to the protonated form of rotigotine.
